

RxKids Hawai'i - Cost & Benefits by Income Quintile, TY 2028

Statutory eligibility: Medicaid (clause 1) OR income <= 300% FPL incl. expected unborn child (clause 2)

Point estimate - true uncertainty is +/-30-40%. No admin caseload exists to calibrate against; cost hinges on soft pregnancy/infant incidence assumptions. Read with the assumption band.

Both arms are driven by birth events (dependents x annual birth rate); each eligible birth draws one prenatal + one postnatal payment. Cost = the take-up-adjusted benefit weighted by the household (WGTP) weight. Eligibility is tested on MAGI at the tax-unit (MAGI-household) grain, the family Medicaid uses. Benefits-by-quintile rank SPM units on summed income into population-equal fifths. Sampling CI is ACS sampling error (SDR, 80 replicate weights); the assumption band sweeps take-up and the birth rate. 2026-2028 FPL is CPI-projected off the 2025 HHS table.
