

# RxKids Hawai'i - Cost & Benefits by Income Quintile, TY 2028

Statutory eligibility: Medicaid (clause 1) OR income <= 300% FPL incl. expected unborn child (clause 2)

Point estimate - true uncertainty is +/-30-40%. No admin caseload exists to calibrate against; cost hinges on soft pregnancy/infant incidence assumptions. Read with the assumption band.

## Fiscal cost (annual)

|                                       |                             |
|---------------------------------------|-----------------------------|
| Total program cost (benefit)          | \$38,398,620                |
| Prenatal arm                          | \$12,098,195                |
| Postnatal arm                         | \$26,300,425                |
| Administrative load (8%)              | \$3,071,890                 |
| Appropriation total (benefit + admin) | \$41,470,510                |
| Sampling 90% CI                       | \$29,183,664 - \$47,613,577 |
| Assumption band                       | \$23,039,374 - \$48,957,704 |

## Scenario comparison

Take-up held constant (0.90 newborn / 0.83 prenatal); only the eligibility gate and postnatal window change. Cost = annual benefit dollars; appropriation adds the admin load.

|                                                     |         |               |               |        |
|-----------------------------------------------------|---------|---------------|---------------|--------|
| Statutory (Medicaid OR <=300% FPL) · 6-mo postnatal | \$4,500 | \$38,398,620  | \$41,470,510  | 16,832 |
| Universal · 6-mo postnatal                          | \$4,500 | \$63,739,402  | \$68,838,555  | 27,941 |
| Universal · 12-mo postnatal                         | \$7,500 | \$107,396,527 | \$115,988,249 | 27,941 |

## Potential option - extend postnatal 6-12 months

The program may opt to extend postnatal payments to the full 12 months (Flint's upper bound). Priced here as an optional add-on:

|                              |              |
|------------------------------|--------------|
| Additional cost (+6 months)  | \$26,300,425 |
| Total cost (12-month design) | \$64,699,045 |

## First fiscal year (launch) - 12mo operating, 12mo enrollment ramp

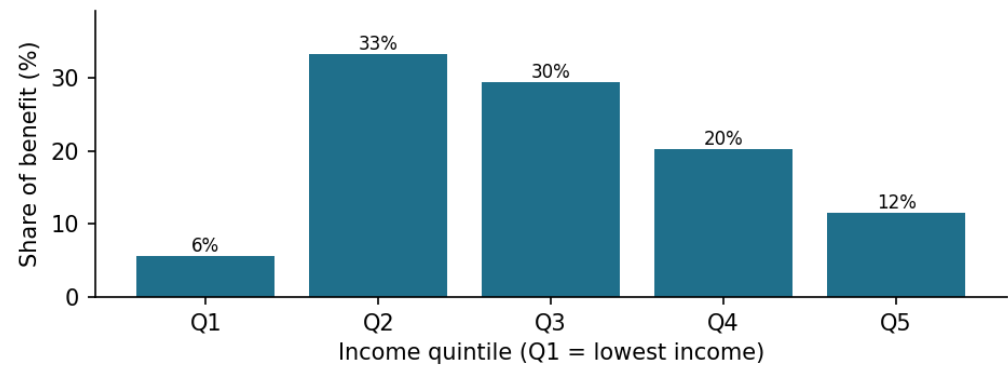

Year-1 cash disbursement, below steady state: enrollment ramps up and the 6-month postnatal caseload takes time to fill.

|                                   |                                            |
|-----------------------------------|--------------------------------------------|
| Year-1 disbursement (total)       | \$15,928,804                               |
| Prenatal / Postnatal              | \$6,553,189 / \$9,375,614                  |
| Postnatal deferred to next FY     | \$4,870,449                                |
| Year-1 as % of steady state       | 41%                                        |
| Ramp sensitivity (6 / 12 / 18 mo) | \$24,919,653 / \$15,928,804 / \$10,619,202 |

## Household reach

|                                |               |
|--------------------------------|---------------|
| Eligible families (weighted)   | 7,340         |
| Expected recipients / year     | 16,832        |
| Expected pregnancies / infants | 8,065 / 8,767 |
| Avg benefit per recipient      | \$2,281       |

## Benefit received by income quintile

| Quintile | Avg income | Families | Recipients | Total benefit | Share |
|----------|------------|----------|------------|---------------|-------|
| Q1       | \$17,179   | 110,267  | 930        | \$2,121,077   | 5.5%  |
| Q2       | \$57,026   | 110,263  | 5,611      | \$12,801,188  | 33.3% |
| Q3       | \$96,722   | 110,317  | 4,962      | \$11,319,157  | 29.5% |
| Q4       | \$154,809  | 110,231  | 3,397      | \$7,749,476   | 20.2% |
| Q5       | \$334,087  | 110,343  | 1,932      | \$4,407,722   | 11.5% |

Cost by county

| County   | Cost total   | Prenatal    | Postnatal    | Recipients |
|----------|--------------|-------------|--------------|------------|
| Hawaii   | \$8,303,727  | \$2,616,243 | \$5,687,484  | 3,640      |
| Honolulu | \$25,363,059 | \$7,991,101 | \$17,371,958 | 11,118     |
| Kauai    | \$2,741,393  | \$863,727   | \$1,877,667  | 1,202      |
| Maui     | \$1,990,442  | \$627,126   | \$1,363,316  | 873        |

Both arms are driven by OBSERVED births (age-0 dependents in each PUMS tax unit), calibrated to CDC NVSR resident births and projected to the target year with the repo's damped-trend ensemble. Each eligible birth draws one prenatal + one postnatal payment. Cost = the take-up-adjusted benefit weighted by the household (WGTP) weight. Eligibility is tested on MAGI at the tax-unit (MAGI-household) grain, the family Medicaid uses. Benefits-by-quintile rank SPM units on summed income into population-equal fifths. Sampling CI is ACS sampling error (SDR, 80 replicate weights); the assumption band sweeps take-up and the birth count (+/-25%). 2026-2028 FPL is CPI-projected off the 2025 HHS table. Full methodology: RXKIDS\_METHODODOLOGY.md.
